EXPERIENCE

Web Developer
September, 2020
Present

Oak Lawn Child Care   https://oaklawnchildcare.ca/

Summary:
- An elegant but beautiful daycare website that is powered by a multi-page waitlist app.
- Waitlist app utilizes user authentication to register parents.
- Parents register their children under a waitlist, provide the required information, and view their rank on the waitlist
- Parents view their children's information and are given complete editing control.

Code: https://github.com/HOPE028/waitlist

Stack: HTML5, CSS3, React.js, Firebase, Firestore Cloud, JSON, React Router, JavaScript

Receptionist and Coordinator
January, 2020
September, 2020

Ruby's Limousine Service

PERSONAL PROJECTS

Othello and AI
Summary:
- Japanese game Othello (Reversi) recreated in Java.
- Player interacts with the console to play against a minimax-powered opponent
- The computer uses alpha-beta pruning and a unique pointage system to choose the best move every time. (It is really hard to beat)

Code: https://github.com/HOPE028/Othello-AI-in-Java

Stack: Java

Visual Sorting App   https://visual-sorting-app.netlify.app
Summary:
- Visualizes sorting algorithms in a visually pleasing way
- Gives users control over array size and sorting speed.
- 6 different sorting algorithms visualized

Code: https://github.com/HOPE028/Visual-Sorting-App

Stack: JavaScript, React.js, HTML5, CSS3
